

**Liskeard Child Development Centre
Sunshine Room**

2. Accidents and first aid

Accidents can be very distressing for anyone involved so at Liskeard Child Development Centre, we follow this policy and procedure to ensure all parties are supported and cared for, and their health, safety and welfare is protected throughout their time in the nursery.

Accidents

Location of accident files: Classroom cabinet

- The person responsible for reporting accidents, incidents or near misses is the member of staff who witnesses the incident. They must record it in the Accident File and report it to the Teacher in Charge. This should be done as soon as the accident is dealt with, whilst the details are still clearly remembered. Parents must be shown the Accident Report and asked to sign it as soon as they collect their child.
- Accident forms are checked termly for patterns e.g. one child having a repeated number of accidents, a particular area in the nursery or a particular time of the day when most accidents happen. Any patterns will be investigated by the Teacher in Charge.
- The Teacher in Charge will report serious accidents to the registered person for investigation for further action to be taken (i.e. a full risk assessment or report under Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (RIDDOR)).
- The Accident File will be kept for at least 21 years and three months.
- Where medical attention is required, a senior member of staff will notify the parent(s) as soon as possible whilst caring for the child appropriately.

- Where medical treatment is required the Teacher in Charge will also inform the insurance company in writing.
- The Teacher in Charge will report any accidents of a serious nature to Ofsted where necessary.

Transporting children to hospital procedure

- If the injury is severe, call for an ambulance immediately. DO NOT attempt to transport the sick child in your own vehicle.
- Whilst waiting for the ambulance, contact the parent and arrange to meet them at the hospital.
- A senior member of staff must accompany the child and collect together registration forms, relevant medication sheets/ Health care plans, medication and the child's comforter. The Teacher in Charge must also be informed immediately.
- Remain calm at all times. Children who witness an incident may well be affected by it and may need lots of cuddles and reassurance.

First aid

The first aid boxes are located in: Child Development Centre Office.

Emergency first aid procedures are located in: Main Classroom.

The appointed person(s) responsible for first aid are: Melissa Sinnamon, Juliet Turner and Kerry Stephens

All classroom staff are trained in paediatric first aid and this training will be updated every three years to ensure this remains current.

When children are taken on an outing away from our nursery, we will always **ensure** they are accompanied by at least one member of staff who is trained in first aid and who carries an appropriate first aid box at all times.

Personal protective equipment (PPE)

The nursery provides staff with PPE according to the need of the task or activity. Staff must wear PPE to protect themselves and the children during tasks that involve

contact with bodily fluids. PPE is also provided for the handling of chemicals and other tasks. This is chosen according to need and will be regularly reviewed to ensure it is suitable and effective. Staff are consulted when choosing PPE to ensure all allergies and individual needs are supported.

Dealing with blood

Always take precautions when cleaning wounds as some conditions such as Hepatitis or the HIV Virus can be transmitted via blood.

Wear disposable gloves and wipe up any blood spillage with disposable cloths, neat sterilising fluid or freshly diluted bleach (one part diluted with 10 parts water). Such solutions must be carefully disposed of immediately after use.

The nursery will not necessarily be aware if there is a child carrying Hepatitis or who is HIV Positive on their register.

Needle puncture and sharps injury

Blood-borne infections may be transmitted to employees who injure themselves with needles, broken glass etc. For this reason, great care must be taken in the collection and disposal of this type of material. For the safety and well-being of the employees, ALL NEEDLES, BROKEN GLASS etc, SHOULD BE TREATED AS CONTAMINATED WASTE. If a needle is found the local authority must be contacted to deal with its disposal.

The nursery treats its responsibilities and obligations in respect of health and safety as a priority and will provide ongoing training to all members of staff which reflects best practice and which shall be in line with current health and safety legislation.
